California State Hazard Mitigation Officer  
California Governor's Office of Emergency Services  
3650 Schriever Avenue  
Mather, California 95655

Dear State Hazard Mitigation Officer,

Pacific Gas and Electric Company recognizes that the FEMA BRIC grant application and selection process will take significant time to complete, with project selection not likely to occur until late 2021. Final project approval and funding award letters will require additional time. This extended timeline is accounted for and reflected in the project schedule, as submitted in the project application materials. Despite the extended timeline for pursuing the grant opportunity and executing construction, Pacific Gas and Electric Company remains committed to providing the required local match funding for the Menlo Park SAFER Bay Project.

Sincerely,

A handwritten signature in cursive script that reads 'Debbie Powell'.

Debbie Powell  
Vice President, Asset, Risk Management, and Community Wildfire Safety Program
